- Menu Button

*For detailed information, refer to the Instruction Manual.
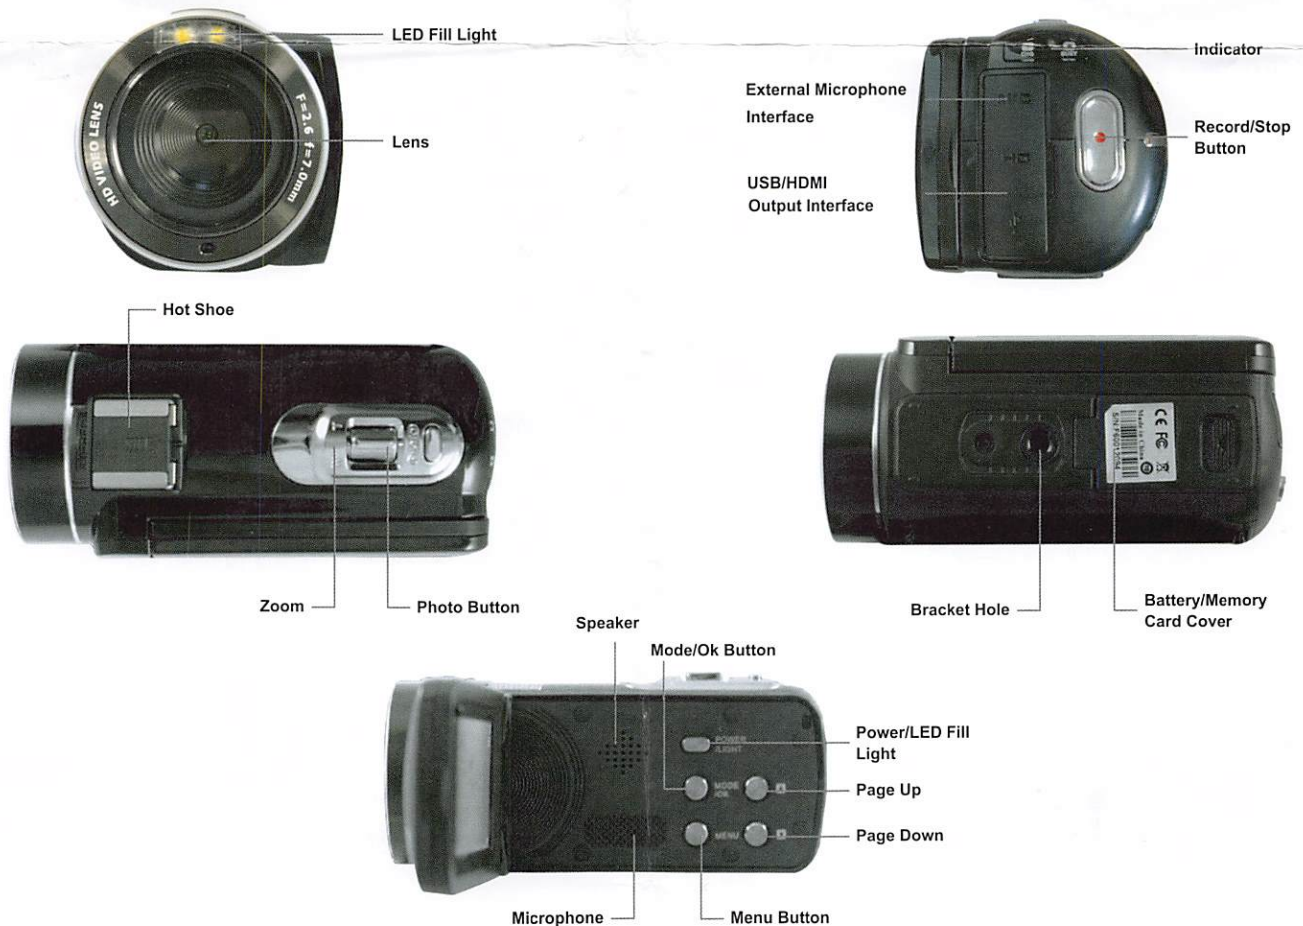

Installing SD Memory Card:

1. Open the battery door by pulling the lever – the door should pop open.

2. Metal contact part should go in first facing up, away from the battery. Insert and push the card in until it clicks into place. Close the door, making sure it is fully locked. A memory card can only be inserted in the proper direction. DO NOT FORCE THE CARD INTO THE SLOT

SD Card Position

The SD memory card lock must be in pushed-in position before inserting battery.

Installing the Battery:

Install the rechargeable lithium battery in the battery slot. A battery can only be installed in one specific direction. Do not force or push down hard on the battery. It will install easily if inserted correctly. Make sure the pins are inserted first, facing up.

Battery Lock

The battery lock must be in pushed-in position before inserting battery.
